LinkedIn GitHub My Protfolio

Final-year BSc (Hons) Computer Science undergraduate currently working as a QA Intern at Neirah Tech Solutions. I have hands-on experience across the software lifecycle: gathering and validating requirements, building web and desktop applications, designing and executing test cases, and tracking defects in Agile teams. I enjoy understanding how systems work, finding where they break, and helping teams deliver reliable, well-documented software. I am looking for opportunities to keep growing in the IT industry across engineering, quality and technical roles.

PROFESSIONAL EXPERIENCE

QA Intern — Neirah Tech Solutions **2026(JULY) – Present**

- Working within a software team to test applications, validate features against requirements and report defects
- Writing and executing test cases, documenting results and re-testing fixes
- Collaborating with developers and QA team members.

PROJECTS

E-Commerce Flower Shop - **First Client Project** **2026**

- Coordinated client meetings, documented requirements and agreed action items, and followed up to ensure timely delivery within scope
- Monitored project progress end-to-end from planning through testing and handover, reporting status to stakeholders at each stage

Delivery Management System - Team Lead - Agile Project **2025**

- Led sprint planning, daily stand-ups, sprint reviews, and retrospectives for a cross-functional development team, ensuring all Agile ceremonies ran on time and produced clear outcomes
- Maintained Trello-equivalent task boards — creating, assigning, and updating tasks to reflect real-time project status across the team
- Monitored project risks and dependencies proactively, escalating blockers and coordinating with Engineering and QA team members to keep delivery on track

EDUCATION

BSc (Hons) Computer Science **2024 - Present**
University of Staffordshire

Computing Foundation **Feb 2024 - Oct 2024**
Apiit Sri Lanka

G.C.E. Ordinary Level **2022(2023)**
9A'S Pass

CERTIFICATIONS- LINKEDIN

- PM
- Ethical Hacking
- Database
- Python
- Linux
- Python
- PM
- Networking

SOFT SKILLS

- Strong attention to detail
- Analytical thinking
- Good communication and documentation skills
- Team collaboration & adaptability
- Time management and multitasking

TECHNICAL SKILLS

•Programming and Web: C#, Python, HTML, CSS, JavaScript, Node.js, OOP
•Testing and QA: Manual Testing, Test Case Design, Bug Reporting, API Testing (Postman), Test Automation (Playwright)
•Databases: MySQL, SQL Server
